

WindoPath®

Version 7 Feature List

Psyche Systems' WindoPath® anatomic pathology information system ranked #1 among all anatomic pathology software solutions surveyed according to the *2010 Top 20 Best in KLAS Awards: Software & Professional Services* report*.

We are happy to announce that Version 7.0 of WindoPath is now available! This version adds new features and functionality to our already full-featured AP system. In addition to enhancements to workflow, usability and efficiency, we have added the following new features and functionality:

New Major Features Now Available in WindoPath V7.0:

- » Prostate case type and diagrams
- » Clinical results blended in the pathology report
- » Reflex testing ordered by physician preference
- » Enhanced report formatting options
- » Incorporation of CAP synoptic reporting macros
- » Specimen and procedure tracking
- » Library and Human Resource entry cloning
- » Scheduled report printing
- » Inventory tracking
- » Additional keyboard shortcuts

PLUS...New Accession Features:

- » Ability to load patient billing and insurance information from previous cases
- » Enhanced date validity checking
- » Ability to remove historic and archive case types from Case Type selection list

New and Enhanced Case List Features:

- » Add special flags to multiple cases at a time
- » Batch change Grossers
- » View and select all cases that have not been completed recently
- » Find all cases that need dictation transcribed
- » Select multiple cases by scanning bar codes or entering a number range

Medical Laboratory Software
You Think, Therefore We Are

WindoPath's flexibility makes it very easy to use because it adapts to the laboratory's workflow and enhances collaboration.

New Quick Case Features:

- » Case opens in the Quick Case Window on the tab that corresponds to the case NEEDS
- » Add, overwrite or select a dictation file for the currently selected tab
- » View all dictation files associated with a case, open the file and position cursor for typing in a single step
- » Preservation of correction reasons from previous corrections of the same case, each properly tagged
- » Keyboard shortcut for date and time stamp entry at the cursor location
- » Ability to associate add-ons on a case level in addition to those associated with specific specimens
- » Ability to associate images at the case level
- » 5 New User-Defined case level tabs
- » Asterisk (*) on tabs containing data
- » Ability to set the slide count for a specimen
- » Additional options in Hierarchy and History windows
- » Ability to automatically flag cases for approval before sign-out
- » New Consult Correlation field in consults window
- » Multiple Special Flags permitted on each case
- » Ability to automatically add current source name to canned text
- » New Pathologist's Procedure window available to simplify adding or changing histology orders

New Pap Case Window Features:

- » Display and accept fractional values in the # of slides field
- » New preference to default Pap Cases to satisfactory
- » Ability to use Capture Specimen Images on Pap cases
- » Keyboard shortcut to jump to Quick Case Window

Archive Window - More Robust Searching Capabilities:

- » Preview cases directly from the Database Lookup window
- » Search for cases with Synoptic reports
- » Search by AKA name
- » Ability to search for cases when specific free text character fields are empty

Clinical Results - New Alerts and Validity Checking:

- » Critical Clinical results flagged until physician notification is confirmed
- » Automatic delta checking on negative and positive results

New Billing Features:

- » Preference to allow only one charge per specific procedure per specimen
- » New user privilege to allow addition of charges after case is complete
- » Define printing of charges on final reports by physician
- » Ability to apply and track payments

Enhanced Physician File Features:

- » Address field available for each physician location
- » Physician locations can be retired without retiring the physician record
- » Enhanced Physician File Features Cont.:
- » Each location allows 2 fax numbers and 2 email addresses
- » Specify # of copies to print per physician per case type
- » Can set AutoFax (fax on sign-out) per physician per case type
- » Ability to clone physician entries

Enhanced Report Formatting Features:

- » Enhanced divider sections - choose size, type, color, etc.
- » Set maximum image dimensions (scaling) for each individual report image section per report template
- » Display historical clinical results on graphs or display in a compact format within the final report
- » Define custom report formats by physician location as well as by specific physician
- » View all cases using a specific report definition and/or template in the formatter windows
- » View example of report templates directly from the formatter window
- » Define specimen label formats by case type
- » Print grid lines in tables
- » Print diagnosis tables in the related cases section of reports
- » Left-justify signatures
